

Learn to play the guitar

for Beginners and Intermediate

With over 20 years of experience in music of different genres and style, I am taking students (Kids, Teenagers and Adults) who are interested to learn to play the guitar - and play it well. Some of the topics I will be covering are:

- Understand how chords are formed.
- Learn proper fingerings of chords and playing scales.
- Finger picking or using a plectrum (pick).
- Playing rhythm guitar with proper strumming is as essential as learning to improvise a solo.
- Or just learn to play your favourite songs - Pop, Rock, Blues, Latin, etc.

Whether you are serious about good guitar playing or just want to play along with friends for fun and recreational purposes, learning to play the guitar is the most satisfying hobby for anyone. The guitar is an instrument that, depending on the type of music, can be learned relatively quickly.

I am flexible in the way that a lot of students like to learn to play the guitar and that is, going straight into learning songs and not be too concern about theories, etc. That is not a problem providing your fingers are apt to proper positioning.

My fee is \$40 per hour and I do house calls for one on one private lessons.
